1. Introduction

This 'Gender Equality and Inclusion Action plan' sets out the Institute of Tropical Medicine's (ITM) approach to gender equality, equity, diversity and inclusion over the 2025-2030 period. The Institute of Tropical Medicine aims to be a just and inclusive institute that encourages diversity.

This Gender Equality and Inclusion Action Plan¹:

- 1. Acts as a public statement of our commitment to progressing gender equality, equity, diversity and inclusion and sets goals and detailed actions and measures to achieve them. The plan is a public document endorsed and signed by the management and disseminated within the institution.
- 2. Has dedicated resources allocated by the management.
- 3. Includes arrangements for data collection and monitoring as part of ITM's annual reporting. We aim to develop a data-driven policy and evidence-based work, adapting the action points where necessary.
- 4. Is supported by training and capacity-building actions that promote gender equality and inclusion, including raising awareness through workshops and communication activities
- 5. Is embedded in ITM's Institutional Policy Plan (2025-2030).

This Gender Equality and Inclusion Action Plan was initially developed by ITM's institutional working group on 'Gender & Inclusion'² and discussed within ITM, incorporating feedback and comments from the bodies below:

Academic Council (AC)	12/05/2025
AC Research Policy Commission	02/12/2024
AC Education Policy Commission	28/11/2024
AC Policy Commission International	03/12/2024
Cooperation	
Student Participation meeting	19/06/2025
Management Committee	08/07/2025

This plan is presented as a work in progress for a continued dialogue in the institution.

² The working group 'Gender and Diversity' was first installed by the Management Committee in 2018. In 2021 an ITM wide call for new members was launched. In 2024 the ITM Management Committee requested the newly composed working group to prepare the Gender & Inclusion action plan 2025_2030. Acknowledgements to all past and current members.

2. Definitions

Gender: socio-cultural meanings associated with being male, female or another identity. These attributes are socially constructed and are learnt through socialization processes.

Diversity³ refers to the existence of different characteristics in a group of people, such as age, geographical origin, gender, gender identity, culture, socio-economic background, migratory, race, religion, ethnicity, sexual orientation, (dis)ability.

Inclusion: the practice or policy of including and integrating all people and groups in activities, organizations, political processes, etc., especially those who are disadvantaged, have suffered discriminations. Following, the antidiscrimination laws in Belgium, no form or expression of discrimination based on gender, color, sexual preference, ethnic or national origin, marital status, birth age, religious or philosophical beliefs, health status or disability can be allowed. This is also outlined in ITM's Code of Conduct, as well as in the internal Terms & Conditions for non-staff members.

Gender Equality⁴: when people of all genders have equal rights, responsibilities and opportunities. It implies that the interests, needs and priorities of women, men and other gender identities are taken into consideration, thereby recognizing the diversity of different groups.

Gender Mainstreaming: Systematic consideration of the differences between the conditions, situations, and needs of women, men and other gender identities in all policies and actions. It is an inclusive strategy to integrate the gender perspective systematically in the process of assessing the implications of any planned action, including policies or programs, in all areas, and at all levels.

Intersectionality⁵: refers to the interconnected nature of social categorizations. It is an analytical tool for studying, understanding and responding to the ways in which inequality arises at the

intersection of different personal characteristics (sex, gender, sexual orientation, disability, nationality, religion and more) and which are influenced by structural factors.

3. Guiding Principles and Institutional Strategic Objectives

The Institute of Tropical Medicine (ITM) is an independent academic institute for advanced training, research and service delivery in tropical medicine and public health with a focus on low- and middle-income countries (LMIC). ITM's mission is:

To conduct and promote scientific research, professional and academic education as well as scientific and community services in the field of tropical diseases and global healthcare, with special attention to low and middle-income countries. (ITM Statutes Art. 3)

Our vision is equal chances at a healthy life for all. We value:

<u>Excellence & Relevance</u>: we strive to stand at the international front line in key scientific domains. We pursue the highest quality research, education, and service delivery to find solutions to global health problems.

<u>Integrity</u>: we want to comply with international ethical standards and aim for critical sense, honesty and transparency in all our activities.

<u>Fairness and inclusion</u>: we commit to equity, diversity, and solidarity with an active, intentional, and ongoing global engagement.

<u>Respect</u>: we believe in an open, transparent, and respectful attitude contributing to the well-being of patients, students, employees, and collaborating partners.

<u>Sustainability</u>: we aim for long-term progress without compromising the ability of future generations.

In the Institutional Policy Plan 2025-2030, we included the following core principles based on ITM's values, with guiding principle 4 playing a key role in this Gender Equality & Inclusion plan:

- Guiding principle 1: We strive to enable societies to cope with the realities of the 'Anthropocene' and its impact on health. We recognise that the most significant impacts of climate change, reduction of biodiversity, food insecurity, demographic shifts, and urbanisation will be felt by people in vulnerable settings worldwide.
- Guiding principle 2: We continuously reflect on the global impact and significance of our actions and strive towards the highest standard of codesign and ownership by our partners.

Crenshaw, K. (1991). Mapping the Margins: Intersectionality, Identity Politics, and Violence against Women of Color. Stanford law review, 43(6), 1241-1299.

- 2. **Guiding principle 3:** We embrace systems thinking, which is reflected in approaches such as One Health, Eco Health, and Planetary Health.6 We recognise that applying these in our academic triad of research, education and capacity sharing is essential to ensure sustainable health.
- 3. **Guiding principle 4:** We affirm the importance of inclusion and equitable representation in all our actions.

In the Institutional Policy Plan 2025-2029/30 we defined the following institutional strategic objectives (SO):

- **SO1** To excel in **research**, pushing the boundaries of knowledge and innovation, leading to cutting-edge **innovations** that can be translated into products and outcomes that directly benefit the health and lives of those in need and contribute to resilient health systems. For this, the early involvement of stakeholders (e.g. communities, policymakers) is essential. Our research will have a profound impact on **health policies globally**.
- **SO2** To thrive as an open global campus for students, teachers, alumni, professionals, and researchers and to serve as a **hub for advanced academic education**. Our academic programmes, online, in-person or hybrid, will be sought after by students from around the world, and our graduates will be at the forefront of a driving change in global public health.
- **SO3** To establish our **medical services** and **reference laboratories** as an unequivocal global benchmark for tropical diseases and travel medicine. We will steadfastly pursue **excellence in patient care** and cutting-edge laboratory diagnostics in the specialised realm of tropical infectious diseases.
- **SO4** To amplify the influence of our collective expertise and knowledge with partners, we will foster increased **scientific exchange and forge synergistic partnerships**. Our focus is on building a shared academic reputation within our global network. Central to our approach is the commitment to equitable partnerships, where collaborations with public and private institutions worldwide are marked by mutual respect, shared objectives, and a dedication to addressing health disparities.
- **SO5** To strengthen the overall coherence, **efficiency and effectiveness** of ITM's policy by investing in research- and management platforms within the organisation or by strategic partnerships.

In view of these institutional strategic objectives of ITM policy plan 2025-2029/30, ITM sets the following long-term objectives for gender and inclusion:

-We want to invest in attracting, fostering and circulating talent ensuring that staff and students are not hampered because of structural or implicit barriers related to gender, cultural or social background or other 'diversity' characteristics.

-We strive to integrate gender and diversity into our research and teaching content, when deemed relevant.

⁶ We adopt the definition of the quadripartite UN organisations, following the One Health High-Level Panel (OHHLEP) (Adisasmito, W.K. et al 2022). ITM recognises that this definition reinforces the overall aims of the related concepts of Eco Health (highlighting the ecocentric versus anthropocentric scope) and Planetary Health (acknowledging the relevance of environmental/ecosystem health)

SO2	We aim to provide an inclusive research, education and working environment reflected through a community that students, staff, visiting partners and guests feel part of, which is safe, respectful, supportive and enables all to reach their full
	potential.
SO3	We want to establish our medical services as a model of excellence in gender
	equality and diversity, ensuring that all patients receive equitable, respectful, and
	inclusive care. We will integrate gender and diversity considerations into all aspects
	of our clinical practice, research, and community engagement, fostering a safe and
	supportive environment for both patients and staff.
SO4	We are committed to equitable partnerships, recognizing the global and diverse cultural contexts in which we work. We aim to foster gender mainstreaming in our partnerships.
SO5	We embed gender mainstreaming, inclusion and equity in our management, policy,
	support, monitoring and decision-making processes.

This gender equality and inclusion action plan concerns the ITM organization as a whole. We aim to work in dialogue and in co-creation with ITM's leadership, departments, units, partner institutions and individuals to ensure commitment enabling sustainable change. Next, we spell out the roles and responsibilities of the different layers of the organisation.

4. Roles and responsibilities

Role	Responsibilities
General Council	Ensuring that the policy, administration and management of the Institute are in accordance with its purpose, identity and integrity (hence, the Gender Equality and Inclusion Policy)
	 Electing members of the Board of Governors and evaluating their performance (oversee balanced composition in terms of gender and inclusion)
Board of Governors	Monitoring management performance of the Institute (including performance in terms of Gender Equality and Inclusion)
Management Committee	Visible Leadership and Accountability
	Being exemplars and proactively advancing the Gender Equality and Inclusion action plan
Heads of scientific and supporting units	Being exemplars and proactively advancing the Gender Equality and Inclusion action plan
	Embedding gender mainstreaming and inclusion into unit planning and action
Gender & Diversity Working Group	• Tracking progress on gender and diversity commitments, defining action points, and ensuring accountability within ITM
	Promoting gender equality, inclusivity, and diversity across the institute
Gender focal points	Act as a reference point for addressing gender-related concerns
	Work closely with the Gender & Diversity Working Group and other internal stakeholders
	(Please note that the implementation of gender focal points is included as an action item in the new plan)
Individual action – staff, students, guests	Emphasis on collegiality and respect, developing own 'gender & inclusion' knowledge, embedding within own work and being an active bystander

5. Actions, targets, and timing

Up until 2022 ITM did not have a dedicated 'Gender Equality and Inclusion Action plan', but equity and diversity were part of ITM's core values, and gender and inclusion were considered important in our policies, guidelines and actions. In 2022, the Management Committee approved and published the first dedicated 'Gender Equality and Diversity Policy and Action Plan, 2022-2024'.

Following an evaluation of the 2022-2024 plan, we observed that not all proposed actions were carried out. To enhance feasibility and ensure meaningful progress, the new plan includes a more focused set of actions. Each action will be assigned a responsible lead to oversee its implementation, while the Gender & Diversity Working Group will provide ongoing monitoring and support. Below, we present the identified actions for the 2025–2030 policy period, prioritizing key actions.

		2025	202 6	2027	2028	2029	2030

instead of one-third benchmark. Lead for action: Management Committee						

In addition to the new actions, ITM will continue the actions previously implemented under the earlier Gender & Diversity Policy and Action Plan, which have positively contributed to gender equality and inclusion within the institute:

- Thinking of the gender & diversity dimension throughout the research cycle
 - Lead for action: Researchers submitting research proposals
- Celebrate International Women's Day (8 March) & International Day of Women and Girls in Science (11 February)
 - o Lead for action: Communication unit
- Beyond the annual alumni webinar series on gender held for the International Day for Women and Girls in Science (11 February) and International Women's Day (8 March), ITM will organize quarterly seminars/webinars on gender and discrimination for students and staff.

- Lead for action: Education office
- ITM ensures its communication is inclusive, representative of its diverse community, and positively reflects its commitment to diversity. Care is taken to avoid tokenism and implicit bias across all channels—online and offline—including the website, intranet, reports, flyers, podcasts, and social media.
 - Lead for action: Communication unit
- ITM is mindful of gender and diversity in all events, seminars, symposia, and media appearances, aiming for diverse and representative speakers and panels.
 - Lead for action: all ITM staff
- ITM ensures that in its reward, evaluation &promotion and processes bias in terms of gender & diversity is avoided. With regard to student selection first academic selection and in second step gender & diversity is taking into account. Adding to this the Leave No One Behind (LNOB) agenda in selection process of bursaries and key target groups
 - Lead for action: HR and education office
- The visibility and accessibility of confidential advisors and ombudspersons is increased for students and staff as well as the procedures better explained
 - Lead for action: SHE unit
- Gender will continue to be implemented as a cross-cutting theme in the DGD-ITM programme (FA5), along with the ongoing monitoring of gender-disaggregated data within FA5
 - o **Lead for action:** International Cooperation office
- Student selection is conducted in two stages: first, based on academic performance, and second, considering gender and diversity. Additionally, the selection process for bursaries and key target groups aligns with the 'Leave No One Behind' (LNOB) agenda.
 - Lead for action: Education office
- To further strengthen the diversification of our student population and to further increase the geographical diversity of external teaching
 - o **Lead for action:** Education office
- ITM will actively participate in Antwerp Pride events by setting up pop-up safe spaces using 20 safe space chairs at various locations throughout the celebrations. These spaces will facilitate conversations about diversity and safety, demonstrating ITM's commitment to equality and inclusion while engaging with the broader community to promote these values.
 - Lead for action: clinic
- On the International Day Against Homophobia, Biphobia, Transphobia, and Intersexphobia (IDAHOT), ITM will issue a statement on social media and within the clinic to highlight the importance of combating discrimination and fostering inclusivity. Supportive messages and materials will be displayed in the clinic to reinforce this commitment.
 - Lead for action: clinic
- ITM will continue to raise awareness on the International Day Against Racism and Discrimination.
 In 2024, ITM clinic launched its campaign, which promoted the clinic as a "safe space." The
 initiative involved placing safe space stickers and visual elements throughout the clinic, and
 capturing photos of staff and patients who support equality and non-discrimination. This
 campaign fosters an inclusive environment where everyone feels safe and respected, regardless
 of personal background.
 - Lead for action: clinic
- To celebrate International Women's Day, ITM will organize a clinic-wide event encouraging staff
 and patients to wear purple in solidarity with gender equality. Last year, the clinic distributed
 purple Easter eggs and pins, inspired by the HRC initiative, to raise awareness and recognize the
 valuable contributions of women in healthcare.
